Here is what instruction will look like:

We will use upper and lower common spaces as classrooms to maximize distance between students. Classrooms will also be used when needed.

Teachers will continue to teach in the block schedule structures using Zoom for their synchronous portion of the lesson. **In-person students** will be on laptops during the synchronous session. During synchronous group activities and all asynchronous activities **in-person students** will work together at a safe distance and receive hands-on support from the teacher for all activities.

We will use classrooms as computer labs for students to attend online classes for hours that there is no in-person teacher available. We are constructing the schedule so that all in-person students will have at least two live teachers and one lab class.

Students will be required to bring laptops (and other supplies) each day. Charging stations will be available in each building.

Please help us by starting the conversation now about safety precautions in the school building with your Scholar(s) who will be returning to campus. This includes maintaining six feet of distance, wearing a mask properly, practicing frequent hand washing, hand sanitizing, and avoiding embracing friends or Crew members (although "air hugs, air high fives, and air fist bumps" are welcome).

Thank you for allowing us to serve your Scholars and Family and for your commitment to U Prep Schools. Let's finish the year strong! **GO PANTHERS!**
